PROFILE

Driven and innovative first-year Computer Science student with a strong foundation in programming, Artificial Intelligence, Web Development, and Android applications. Adept at building real-world projects, exploring emerging technologies, and delivering creative solutions. Passionate about contributing to impactful projects, participating in hackathons, and continuously growing as a technology enthusiast.

PROJECTS

OSKY AI ASSISTANT — 2025
ADVANCED AI ASSISTANT

- Technologies: Python, OpenAI API, GUI, Chatbot Development, Code Editor Integration
- Developed a JARVIS-like AI personal assistant capable of performing multiple tasks, including conversation, coding assistance, and task management.
- Integrated wake word detection, voice recognition, and chat

PORTFOLIO WEBSITE — 2025
Technologies: Next.js, Tailwind CSS, Vercel Deployment

- Designed and developed a personal portfolio website to showcase projects, skills, and achievements in a professional format.
- Implemented responsive design for seamless user experience across devices.
- Showcased project cards, contact section, and resume download for easy access by recruiters or collaborators.

PDF CHATBOT — 2024 - 2025
Technologies: Python, Natural Language Processing (NLP)

- Developed a chatbot capable of answering queries from PDF documents, enabling users to extract information quickly.
- Implemented PDF text extraction and semantic search to understand and respond to user queries accurately.
- Built a user-friendly GUI for easy interaction with documents.

CERTIFICATION

- Python Programming – Google – 2025
- Introduction to AI & Chatbots – Udemy – 2025
- Web Development with React & Tailwind – IBM– 2025
